Please submit all questions in writing for the sake of documentation.

TEUH - The European Ukrainian Hub is a national entrepreneur project running from December 2023- July 2024. Through this period of time, the goal is to educate and improve the entrepreneurial skills of more than 1.000 Ukrainians residing in Denmark.

The task:

We TEUH - The European-Ukrainian Hub are looking for a collaboration partner(s) to perform multiple or all of maximum 30 workshops on Green transition across Denmark for potential Ukrainian entrepreneurs. All workshops must be completed by 30/6 2024 at the latest.

The content of the workshops must be provided in at least a bundle of 10 workshops, and have Entrepreneurship in focus. The topics are not fixed, but can be put together based on experience.

Topics can include but are not limited to:

Sorting your waste: the basics, why it's important and how waste from your home/office becomes a wasteful resource. What an entrepreneur needs to know when organizing the work of a team.

How Denmark became Europe's leader in environmental innovation and how it affected trends in the business environment.

Marketing: how and who made the ideas of environmental responsibility popular (analysis of cases, stories, working in groups, in particular, creating messages for new target groups)

Overview of government programs to support "green" business initiatives

Dresses made of sea nets and furniture made of plastic bottles: How Danish companies create new objects from waste? (case studies, business tours to these companies)

Ecological approaches in small business. The use of ecological materials in the home - industry. Analysis of the beauty salon case.

Environmental management for beginners. What are the signs of an environmentally responsible company, what is the certification system, why is it important.

Amager Bakke: how the Danish waste recycling plant became a model and inspiration for the whole world.

Environmental responsibility and what new types of business and entrepreneurial opportunities it creates.

Second-hand store: business model, marketing, product processes.

Furniture, dishes, art: how the Danes built a system of exchanging things and combined environmental goals with entrepreneurship

Loppemarked as a part of Danish life and as a newcomer to join this movement.

Too good to go: mission, business model, technical solutions, work with partners (webinars + business tour).

Business cases in the field of waste processing.

As well-known Scandinavian companies develop a culture of smart consumption and adhere to the "green course".

"Green transition": why it is important and how it will affect business development in the next 10 years.

Startups and innovations in the environmental field: where to look for partners and opportunities in Denmark

We are looking for a partner, company, organization or individual entrepreneur who will organize a set of educational events on the topic of ecology, smart consumption, waste recycling, decarbonization and other topics of this spectrum. These can be lectures, webinars, analysis of cases, workshops, tours to Danish companies and meetings with management, visits and analysis of cases of business initiatives in the field of ecology, as well as sharing experience of how entrepreneurs develop their business, relying on ecological approaches and implementing appropriate technologies .

The purpose of these programs is to acquaint the Ukrainian business community with the Danish experience of implementing ecological approaches in business, to support Ukrainian business initiatives on the way to building and developing their business with respect for the environment and values that are important for Danish society.

The Business Hub is interested in involving a partner in this spectrum of work, who will conduct up to 30 activities of various formats for the Ukrainian community in the period from May 1st to July 30th, but we

will aim to have all workshops concluded by June 30th. It is expected that about 150-300 Ukrainians in Denmark will be involved in all the activities of the program.

The partner is expected to collect 5-6 reviews from participants, prepare and distribute activity announcements in the Ukrainian community, interact with business hub partners in terms of marketing.

The topics are not fixed, but can be put together based on experience from previous courses. We are also open to suggestions.

The supplier must be able to organize and conduct the workshops independently, be it physically, online, or physically with livestream option. Arrange date and time with TEUH, and arrange marketing content with TEUH.

It is a requirement that suppliers can develop, organize, and run workshops on the basis of high professional skills and teaching experience. This includes the ability to produce quality content that creates high returns for the target group (Ukrainian entrepreneurs in Denmark) based on concrete tools, tips, and content.

The target group is Ukrainian refugees residing in Denmark. The project's main purpose is for the target group to acquire skills and knowledge that can help them start a business in Denmark or Ukraine.

The workshops must contribute to creating:

- *Growth and employment - The effort must give Ukrainians the opportunity to acquire skills to create growth and employment while they reside/stay in Denmark. Through their professional activity, turnover, jobs and growth must be created as a consequence.*

Overall, each workshop must be able to engage at least 15 entrepreneurs. There is a great deal of freedom to structure the process as the supplier sees fit. The ordering party assists the supplier with inspiration and teaching materials from previously held workshops. The workshops must be conducted on evenings and weekends to accommodate the target group. It is very likely that several workshops will be running at the same time. The recommended time for workshops is 1-2 hours.

The workshops should be facilitated in English or Ukrainian. The offer should clearly state which language the workshop will be facilitated in, or if it can be facilitated in both languages. If the workshop is in English, we need to know if the presentation can be in Ukrainian.

It is important for the entrepreneurs' experience that they are met at eye level and that they get the opportunity to put their individual projects in focus through the workshops.

In the process of recruiting participants for the course, we expect the supplier to provide input for marketing material and help share on its own channels aimed at the target group, where this may be relevant. We expect the supplier to create a 1-minute video in which they talk about the course, at least 2 promoting posts on social media, and 1 feedback post on social media with tagging The European-Ukrainian Hub. This will be agreed in detail with the selected supplier.

The offer must include one overall price for the amount of workshops the supplier wishes to conduct, and price pr. workshop. The price must include all costs associated with the development, organization and conducting of the workshops - e.g. preparation time, driving, transport, materials, diets etc. It must be

clearly stated in the offer what is expected of costs in connection with teaching and what is expected of costs for transport, meals, and accommodation. It is permitted to indicate a differentiated price or differentiated solution proposal per region and for an online workshop (Copenhagen area, Zealand, Funen, South Jutland, Central Jutland and North Jutland). In addition to the registered participants, there must be room for employees from the contracting authority.

If the course and the collaboration are successful, there will be the possibility of performing repeated courses within the project period. Courses must be able to be completed throughout the country as well as online, and if this is not possible, then this must be clearly stated in the offer. The supplier should indicate whether or not they are interested in being selected for only parts of the project.

1. Task description

If you can handle the entire task and cover all topics, the partner must:

- Conduct a minimum of 10 workshops from May 2024 until 30/7 2024.
- Overall, each workshop must be able to accommodate a minimum of 15 participating entrepreneurs as well as any representatives of the ordering party.
- Describe the content of the individual workshops.
- Facilitate the individual workshops in such a way that the entrepreneurs can work practically with their idea.
- Actively participate in marketing efforts of the offer.

2. General requirements for all workshops:

- Workshops must be a mixture of professional inputs, presentations and practical exercises.
- Emphasis must be placed on the participants acquiring skills that can be converted into their own business or its development.
- Workshops must end with suggestions and references to the participants for further insights within the given topic and/or advice on next steps.
- Workshops must provide the participants with suggestions for literature, articles, websites, social media etc., which can be useful in their further work in developing their business ideas.
- Workshops must inform where the entrepreneurs can find help from both public and private advisers.
- Workshops are expected to be held during the evening, and potentially on weekends which is why the supplier should be able to show flexibility for this.
- It is expected that the suppliers can give the participants access to relevant material and information via a suitable digital platform, as well as make all material available to TEUH - The European-Ukrainian Hub.
- The supplier must provide the information about the speakers on each workshop, the slides or other materials, proving of workshops being held and being open to workshops being recorded.
- For activities that are carried out in whole or in part virtually, the supplier must show experience with performing workshops online, as well as ensure that the technical setup can carry out the task in a professional manner.

- The supplier must provide professional equipment (computer, microphone, camera, etc.) for online activities.
- The ordering party makes Zoom available for performing an online workshop.
- A coordinating meeting will be held with the selected supplier, where the final details and any adaptations are agreed upon in more detail.
- During the process, the selected supplier must help to identify the most promising participants and pass on who these are to TEUH - The European-Ukrainian Hub.
- The supplier is committed to an iterative process with continuous quality assurance based on feedback and possibly adjustment based on user evaluations.

The service must include active and polite communication with the workshop/course participants, including inviting them to the following workshops if there are several of them, reminding about and reviewing homework, inspiring participants to leave feedback in SoMe about the workshop.

Please note that it is not possible to become a supplier to TEUH - The European-Ukrainian Hub if you are a registered participant in TEUH - The European-Ukrainian Hub of 2024.

3. Offer specification

The offer must be sent to andreas@ivaekst.com and include CVR no. The offer must be dated and signed.

The offer to TEUH - The European-Ukrainian Hub should amount to approx. 2-5 pages and specify:

- Price for performing at least 10 workshops incl. preparation, transport, meals, accommodation and materials. As well as the price for repeating the workshops. The price must be all-inclusive, as there will be no possibility of reimbursing expenses outside of the delivery.
- Contact person(s) regarding the course. Name, organization and e-mail address should be specified here.
- Description of the contact person(s) who will carry out the task.
- Description of the overall content of the workshop(s).
- Description of the specific entrepreneur target group, if this is desired to be described in more detail than the general framework.
- Confirm whether the supplier wants to let the offer apply to later processes, even if you do not initially win the task. This can come into effect, among other things, if the project assesses that there is a need for more suppliers to solve the task nationally or several processes. The task and offer price must be unchanged.

The total budget for the task of 10 workshops is up to DKK 30.000 DKK excl. VAT. or 3.000 DKK pr. workshop excl. VAT. Price for any repetition of a workshop must also be stated in the offer in order for the supplier to be offered the execution of several similar workshops in the future.

The payment is due 30 days after the end of the final workshop.

In the selection phase, an assessment is made of the individual tenderer's general suitability in relation to the requested task. The assessment is made on the basis of the evaluation criteria below.

The evaluation criteria and their weighting are as follows:

- Price: 20%

The tenderer is asked to specify the price based on:

- Organisation/preparation (incl. coordination with TEUH - The European-Ukrainian Hub) and development of teaching material.
 - Implementation of teaching.
 - External costs associated with settlement (e.g. transport, diets, overnight stays, printing etc.).
-
- Quality: 80%

Quality is assessed based on the following 4 criteria, of which the overall offer must give a clear picture:

- The concept, structure and relevance of the workshops.
- Professional competences in relation to the theme of the workshops.
- Experience and skills in relation to teaching and facilitation.
- Understanding of and experience with the course's target group.

IVÆKST ApS reserves the right not to choose one of the offers received if no offer is deemed to be able to perform the task satisfactorily. In that case, the project assesses whether the task is advertised again or not carried out.
